

Sybase and PowerBuilder User Group Switzerland - History 2006

Sybase and PowerBuilder User Group Switzerland

Meeting 9. June

Alex Pratt of Sybase UK showed us where Sybase heads with its design and development tools. We also got a first impression of PB11 (The beta is available at http://www.sybase.com/pb_11_beta). PowerDesigner 12.x is quite impressive and supports software development in all areas quite strong.

In the afternoon Ian Thain showed us the new features off the Sybase Workspace and what we can do with PocketBuilder.

The last presentation was by Andreas Widmann of Mercury, who showed us how to manage quality and testing in software projects using Mercury Quality Center and Winrunner.

At the end of the meeting we could give away 4 copies of SQL Effects Clarity for Windows, which were sponsored by [SQL Effects](#).

Some of the presentations will be downloadable soon

Meeting 8. December

John Strano showed us PB 11 WinForms, WebForms and the generation of WebServices. The future of PowerBuilder looks quite impressive.

Markus Müller from Sybase Germany presented the brand new SQL Anywhere 10 and showed how "programming" with the Unwired Accelerator works.

Mike Harold, President of the International Sybase User Group presented us the pros for joining the International Sybase User Group as a Group

The day ended with the General Assembly. You can [download](#) the minutes from the resource section.
